

Hara brow stain can be used to create a number of different brow styles including bold, ombre, brushed tint and hairstrokes. We will be demonstrating an ombre brow today, which is softer at the front of the brow and darker and more defined at the tail.

Preparation

Thoroughly cleanse the brow area with Hara Lash & Brow Cleanser. Using a disposable mascara wand to apply the cleanser will exfoliate the brow area making sure you have a fresh canvas to work on.

Use a dry cotton pad to thoroughly dry the area after cleansing.

Step 1: Lifting Cream

Apply Hara Step 1: Lifting Cream to the brow. This solution breaks down the disulfide bonds in the hair bonds, making the hair malleable and allowing them to be repositioned into the desired shape.

Processing times:

- Very fine brows: 3-4 min
- Fine or tinted brows: 4-5 min
- Natural healthy brows: 5-6 min

Once processed remove with a clean cotton bud.

Step 2: Neutralising Lotion

Apply Hara Step 2: Neutralising Lotion to the brows and comb through using a mini lash & brow wand. This step is where the hairs are set into place so make sure the brows are combed into the required shape.

Processing times:

- Very fine, fine and tinted brows: 5 min
- Natural healthy brows: 6 min

Once processed remove with a dry cotton bud.

Map the perfect brow

Use Hara Mapping Thread to map out the ideal brow shape for your client.

Start in the centre of the brow and mark out the front of the brows. Next measure from the corner of the nose and through the iris to find out where the arch of the brow should be. The corner of the nose to the corner of the eye determines where the brow should end.

Measure the thickness of the brows and then connect the shapes that you've previously marked to create the perfect brow shape.

Ombre brow stain

Mix Hara Brow Stain with Hara Lash & Brow Developer Cream and apply to the brow.

Use an angled brush to apply the stain, starting at the bottom of the brow and then apply upwards. Use stamping motions to ensure you get an even application. Use a mini lash & brow wand to blend the stain at the front of the brow for a softer look.

Remove the stain from the front of the brow with a dry cotton pad, leaving on the arch and tail to create an ombre effect.

BROW LAMINATION AND STAIN PROCEDURE

Wax to create the shape.

Using Hara Rosin Free Stripless Wax remove all the hair that is outside of the desired brow shape.

This wax is ideal for brow waxing as it can be reapplied 2 or 3 times and is capable of encapsulating hairs as short as 1mm. It's rosin and fragrance free making it suitable for even the most sensitive skin.

Step 3: Moisturising Serum

Remove remaining stain with a dry cotton pad and apply Step 3: Moisturising Serum. This will nourish the hair and surrounding skin as well as hold the brows in place.

To ensure that your clients brows remain looking perfect and healthy make sure that they follow the following aftercare advice:

- Avoid getting brows wet for 24 hours.
- Makeup should not be applied for 24 hours.
- Do not allow prolonged exposure to direct sunlight or use of sunbeds.
- Use a brow conditioner daily.
- Tweezing brows in between appointments is to be avoided to maintain the best long term-shape.
- Do not apply retinol, AHA or exfoliate around the brow area for three days either side of the treatment.
- No self-tanning products should be used on the face for 48 hours either side of treatment.
- Staining results will be darker and more defined immediately after the treatment
- Oil based cleansers can cause the tint to fade faster.
